

AWANA CREATIVE COMPANY PROFILE

AWANA CREATIVE

WEB DEV AGENCY

ABOUT AWANA CREATIVE

We are a strategic design and development studio based in Malaysia. We're specialised in online platforms, web app's, e-commerce and digital branding. With our team of six, we combine beautiful and user friendly design with solid coding and stellar service.

Awana Creative is a young Malaysia design agency. From the get-go we've wanted to create work that matters and stays etched in the mind of the viewer. Whether we're cracking down on a visual identity, video or website we make sure that it will turn heads. In fact, we put a little bit of our soul in each design we create. Free of any one particular style or perspective, our communal vision is something you can feel in our work

SERVICES

IDENTITIES & CAMPAIGNS

We're proud of our talent to seamlessly translate one strong idea into a number of different media. This comes in handy when you want to design a visual identity that communicates as clear as plain daylight

WEBSITES DEVELOPMENT SOCIAL MEDIA MARKETING

We create websites as if they're freshly baked "cookies". We'll help you with function, usability, design and testing. And since we're nerds, everything'll be fully responsive and developed using the latest techniques.

Social media marketing can increase traffic, develop fans, generate leads, improve search engine rankings and increase sales. We can write and schedule daily posts and respond to comments to grow and engage your social media following.

SEO/SEM

SEO is the process of improving your website's ranking in search engine results for keywords that your target market is searching. Some of our techniques include content optimization, link building and checking for duplicate content.

E-COMMERCE

We design and engineer experiences that engage your customers across web, mobile, and social platforms. These may include websites relaunch, e-commerce websites, content management systems and mobile applications.

WEB MAINTENANCE

Hiring us for web maintenance is a great way to keep your website looking as pristine as the first day it was launched. Oftentimes, images, pages, and functionality get broken when clients maintain their own websites
